Supplementary Material 3:

Enhancing the development of experimental design skills in life science undergraduates.

Interview Schedule

1. In your opinion, how successfully were the outcomes of your Insect Project?

2. What impact did the fact that you had an element of choice in the project you did have?

3. What impact did the fact that you were assessed by group presentation have?

4. Did the Insect Projects compare in any way with previous experimental work you have experienced?

5. Was the timing of the Insect Project important?

6. Did you feel that any decisions you made in the Insect Project were influenced by what you learned in the Experimental Design sessions?

7. Did these sessions make you more or less interested in the Insect Project?

8. Did these sessions make you more or less confident about the Insect Project?

9. Did the fact that there was a series of discussion sessions specifically about Experimental Design influence the way you subsequently engaged in experimental work?
